

Scribe Insight - Migrate License for Salesforce

“One of the great things about Scribe Insight is how flexible and adaptable it is to handle our unique business needs.”

–Jack Sands, Chief Executive Officer, Vforce Auto Club Renewals

Scribe Insight - Migrate License

Scribe Insight enables customers to quickly and seamlessly integrate mission critical applications with other applications and data stores in the enterprise. Scribe Insight is the core technology used for the migration and integration solutions offered by Scribe and its network of resellers and partners designed to maximize the ROI of their customer’s business applications. These solutions utilize a unique and open template model that enables users to quickly and efficiently configure any data integration or migration to meet specific needs, all without having to write a single line of code.

Key features include:

➤ A graphical user interface enables non-programmers to configure complex processes efficiently, eliminating the need for custom programming

- The ability to communicate with applications using their own external interface to ensure consistent and accurate data migration. Scribe Insight communicates with Salesforce using its own web services API.
- Users can quickly match fields between the data source and Salesforce to create a migration.
- Includes 150+ of predefined functions for items such as data lookups, parsing, and sound matches, which increase efficiency when configuring data translations and transformations.
- Preserves the integrity of the data and makes initial data loads and legacy migrations a safe and predictable process.
- Templates for some of the most common migration scenarios that can be used as a starting point and configured to meet your unique needs.

Scribe Insight – Migrate License Bundle \$1,900

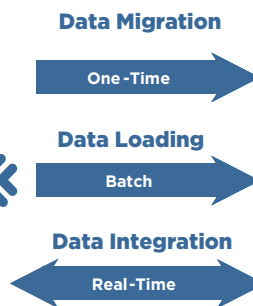

Included in this bundle are all of the components needed to conduct a successful migration of data into Salesforce using Scribe Insight.
