

## Scribe QuickBooks to Microsoft Dynamics® GP Migration Template

**“Scribe Insight could handle a lot of data very quickly - much faster than Integration Manager.”**

–Michael Eckstein, Systems Supervisor, Steel Dynamics-Flat Roll Division

Scribe offers a migration and integration solution that will maximize your Microsoft Dynamics GP investment by pulling in critical data from QuickBooks, and making it all work for you where you need it, when you need it.

Scribe templates represent complete or partial data integration or migration processes that have been developed using Scribe Insight. The QuickBooks to Dynamics GP Template is a highly functional “starting point” that supports key customer-related business processes. This template can be extended and customized to meet each customer’s needs. This template converts the following data:

- › **Customers** – migrates customer information from QuickBooks to Dynamics GP, including addresses from all jobs defined in QuickBooks, eliminating duplicate data entry and enabling you to always work with the most up-to-date customer information.
- › **General Ledger** – Converts transactions and beginning balances as of a specified date..
- › **Invoices** – Payables transactions and distribution is migrated to Dynamics GP including unpaid invoices, credit memos with a balance, and vendor information including addresses, notes, and terms.

- › **Receivables** – Transactions and distribution of unpaid invoices, credit memos with a balance, and cash receipts with an unapplied amount.

Scribe provides a number of these Templates to customers and partners as free downloads from the Scribe Web Community to support the successful deployment of Scribe Insight. Additionally, many Scribe Resellers have created their own Templates designed to meet specific market needs.

### Make your enterprise applications work for you:

- › Increase revenue
  - Generate accurate sales quotes
  - Execute on product focused sales campaigns
- › Retain more customers
  - Have real-time customer data as you meet with them
  - Deliver the right products, on time
